#### **DETAILED ACTION**

### Claim Objections

Claim 1 is objected to because of the following informalities: if the language in line 2, "essentially consisting of", was meant to define the scope of the claim with respect to what unrecited additional components or steps, if any, are excluded from the scope of the claim, the proper language, "consisting essentially of", must be used in the claim. See MPEP 2111.03. Appropriate correction is required.

Claim 3 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

#### Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "the carbon amount" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 1745

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

#### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 102 (b) as being anticipated by or, in the alternative, under 35 U.S.C. 103(a) as being obvious over Inoue et al. (JP 2000-021402).

Inoue et al. an active material for a positive electrode constituting a secondary battery together with a negative electrode, a separator and a lithium salt containing nonaqueous electrolyte, and containing a sulfate radical preferably formed of an inorganic or organic sulfate of 0.01 to 5 weight % to the positive electrode material (see abstract). Inoue et al. discloses in paragraph 0021, a general formula for the positive active material:  $\text{Li}_x \text{Ni}_y \text{Co}_{1-y-z} \text{M}_z \text{O}_2$ , where M is at least one metal selected from Al, Mn, Ti, Fe, and Zn, and  $0.1 \le x \le 1.05$ ,  $0 \le y \le 0.9$  and  $0 \le z \le 0.2$ .

Application/Control Number: 10/781,624 Page 4

Art Unit: 1745

Since Inoue et al. discloses the same active material for a positive electrode as described above, then inherently the same active materials for a positive electrode having an occupancy rate of lithium found from the X-ray diffraction chart and using Rietveld analysis of 98% or greater, having the carbon amount measured by way of the high frequency heating-infrared absorption method of 0.12 wt% or less, and having a Karl Fischer moisture content of 0.2 wt% or less when heated to 180°C, would be obtained and would obviously have been present once the Inoue et al. product is provided. *In re Best*, 195 USPQ 433 (CCPA 1977).

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karie O'Neill whose telephone number is (571) 272-8614. The examiner can normally be reached on Monday through Friday from 8am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on (571) 272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
